25X1A

25X1B Comment. The three motor vehicle belong to the 17th Gds Mecz Div which is thus again confirmed in this area until the end of February 1951. 25X1X Comment. In November 1950, a large number of 25X1X Soviet troops in Kecskemet, no troops in Bekescsaba, and barracks installations under construction in Kiskunfelenyhaza, without, however, specifying whether these installs tions were to quarter Soviet or Hungarian troops. See 25X1A Since the present report stated that there 25X1X were no changes in the occupation of Kecskemet, Bekescsaba and Kiskunfelegyhaza, it is believed that in February 1951 Soviet troops were still in Recekemet, but not in the other two towns. a Soviet anit with 35 to 40 tanks to have been stationed in Szeged at the end of 25X1X 25X1X 25X1X1X April 1950 other tank units were unloaded in Szeged and moved by road toward kiskunielegyhaza, in mid-April 1950. the present report, however, indicates that Soviet troops were no longer 25X1A in the Szeged area in February 1951. Compare with a previous report in which the absence of troops in Kiskunfelegyhaza as 25X1X early as October 1950. 25X1A . It is believed that the troops milegedly located in that area in April 1950 had been there only temporarily. The present report confirms the location of Soviet troops in Cegled and 25X1A . It is possible that these two towns are the principal posts of the Soviet division, pesaibly the 25X1X 2nd Cds Mecz Div, which is stationed in central and southeastern Hungary. 25X1X Comment. The information supplements previous statements 25X1X in Szekesfehervar until June 1950. 25X1A
